PROFESSIONAL SUMMARY

Versatile and results-driven IT Engineer and Full-Stack Systems Developer with over 8 years of progressive experience spanning systems administration, network engineering, full-stack web development, and applied artificial intelligence. Proven track record in maintaining critical server infrastructure, configuring robust networks (including Starlink deployments), and engineering custom software solutions. Highly skilled in translating complex business or academic requirements into production-ready software systems utilizing Python, machine learning, and advanced security frameworks.

CORE & PERSONAL SKILLS

Technical & Engineering Skills

- **Software & Web Development:** Python, PHP, MySQL, Full-Stack Web Development, UI/UX Design.
- **Mobile App Development:** Kotlin, Mobile Application Architecture.
- **Network Administration:** Computer Networking, Client-Server Architectures, Infrastructure Deployment, Configuration.
- **Hardware Engineering:** Computer Systems Repair, Hardware Diagnostics, Component-Level Maintenance, Equipment Troubleshooting.
- **Graphics & Digital Design:** CorelDRAW, Canva, Visual Assets Creation.
- **Database Management:** MySQL, Microsoft Access, Relational Database Design.

Enterprise Productivity & Remote Collaboration

- **Productivity Suites:** Microsoft Office Suite (Word, Excel, PowerPoint), Google Workspace (Docs, Sheets, Drive).
- **Remote Operations:** Slack, Google Meet, Zoom, Remote Technical Troubleshooting.

Soft Skills & Core Competencies

- **Analytical Problem Solving:** Rapid diagnostic capabilities across both complex software code and physical hardware architecture.
- **Team Leadership & Mentorship:** Experienced in guiding technical interns, managing operational workflows, and coordinating with academic supervisors.
- **Cross-Functional Communication:** Skilled at translating complex technical IT requirements into simple explanations for business stakeholders and clients.
- **Adaptability & Time Management:** Proven ability to balance multiple high-priority development contracts alongside corporate IT administrator roles.

INDUSTRIAL EXPERIENCE

IT Engineer *2025 – Present*

Hara-Foam and Chemical Limited *Nasarawa State, Nigeria*

A manufacturing and distribution company specializing in mattresses, pillows, bedsheets, sheeting, and bedframes.

- **Network Administration:** Plan, design, and implement computer networks; configure network devices including Starlink, routers, and switches; troubleshoot network connectivity issues.
- **System Administration:** Manage and maintain computer systems, install and configure software, perform system upgrades, and provide technical support to company staff.
- **Database Administration:** Manage and maintain company databases, design database structures, write SQL queries, and ensure data integrity.
- **Server Administration:** Maintain server health by monitoring CPU, memory, and storage capacity; apply Windows Server OS updates; manage user access, passwords, and folder permissions; and troubleshoot system freezes or crashes.

Managing Director of Operations *2019*

Global Hi-Con Computers *Oghara, Delta State, Nigeria*

Directed overall business operations, financial strategies, and service delivery for the computer enterprise.

- **Financial Oversight & Profitability:** Managed budgeting, cash flow forecasting, and financial reporting while implementing cost controls to maximize business profitability.
- **Operations & Facility Management:** Overseen day-to-day business operations, managed staff scheduling, and coordinated the maintenance of equipment and facilities to ensure efficient service delivery.
- **Client Relations & Retention:** Maintained high customer satisfaction levels by ensuring excellent service delivery, managing client relations, and swiftly resolving complex customer complaints.
- **Business Development & Marketing:** Spearheaded sales strategies and marketing campaigns to promote technical services, acquire new clients, and build long-term business partnerships.
- **Technology Integration:** Evaluated and upgraded the enterprise infrastructure with modern hardware and software solutions to keep services aligned with evolving technological trends.

Web App Developer *2018*

Global Hi-Con Computers *Oghara, Delta State, Nigeria*

Engineered and maintained functional web applications, managing both client-side and server-side components.

- **Full-Stack Development:** Built responsive user interfaces (UI/UX) using HTML, CSS, and JavaScript, and developed robust server-side logic integrated with databases and APIs.
- **Testing & Debugging:** Conducted end-to-end testing and code diagnostics to identify, troubleshoot, and eliminate bugs, ensuring applications met functional requirements.
- **Maintenance & Security Updates:** Maintained deployed applications by patching security vulnerabilities, optimizing source code, and introducing new features to preserve cross-platform compatibility.

Industrial Training (IT) Intern *2017*

I.T Global Technology *Oghara, Delta State, Nigeria*

Gained hands-on technical experience in network deployment, systems support, and full-stack web development during a structured internship.

- **Network Infrastructure:** Assisted in planning and deploying local networks, configuring routers and switches, and diagnosing connectivity faults.
- **Web Development:** Participated in building and maintaining responsive websites using HTML, CSS, and JavaScript, supporting both front-end UI layouts and back-end logic.
- **Systems Administration:** Handled basic system maintenance, installed software updates, configured workstations, and provided technical helpdesk support to users.

SIWES Technical Intern *2015*

I.T Global Technology *Oghara, Delta State, Nigeria*

Acquired foundational, hands-on engineering experience in computer hardware diagnostics, operating system deployment, and IT support.

- **Hardware & Software Diagnostics:** Diagnosed and repaired component-level faults across desktops, laptops, servers, printers, and scanners.
- **System Deployment:** Assembled computer hardware systems, deployed clean operating system installations, configured core software applications, and initialized local network configurations.
- **Preventative Maintenance:** Executed routine system maintenance schedules, including physical dust cleaning, malware eradication, and patch deployment to optimize hardware longevity.

TEACHING & ACADEMIC EXPERIENCE

National Youth Service Corps (NYSC) – Corper *2025*

The Federal Polytechnic, Nasarawa *Nasarawa State, Nigeria*

Served in the Registry Department (Academic Board Division), providing administrative and secretarial support to the Deputy Registrar.

- **Correspondence & Announcements:** Drafted and typed official memos, publicity announcements, and institutional notices in coordination with the Deputy Registrar.
- **Minutes Transcription:** Transcribed and produced detailed minutes for all Academic Board meetings and other official institutional committees.
- **Document Management:** Organized, sorted, and distributed critical documents and agenda packs ahead of Academic Board sessions to ensure smooth meetings.
- **Official Documentation:** Prepared and formatted official appointment letters for external examiners and academic consultants.
- **Administrative Liaison:** Assisted the Deputy Registrar by receiving, logging, and routing incoming and outgoing memos on behalf of the Registry.

Assistant Resource Person / Instructor *2022*

The Federal Polytechnic, Nasarawa *Nasarawa State, Nigeria*

Delivered practical, hands-on training to students in Computer Hardware Maintenance, System Repair, and Networking.

- **Hardware & Software Troubleshooting:** Instructed students on how to diagnose, troubleshoot, and repair component-level faults in desktops, laptops, printers, and scanners.
- **System Installation & Configuration:** Guided students through assembling PC hardware, installing operating systems (Windows/Linux), setting up application software, and configuring local network parameters.
- **Routine Maintenance & Optimization:** Demonstrated preventative maintenance procedures, including physical cleaning, running malware/virus scans, and deploying software updates to optimize system performance.
- **Network Infrastructure Training:** Trained students on basic network administration, including installing routers and switches, implementing basic network security protocols, and resolving connectivity issues.

Industrial Base Supervisor (SIWES) *2021*

Al-Rahman Training Institute *Tammah, Nasarawa State, Nigeria*

Supervised, mentored, and assessed Computer Science students undergoing their Students Industrial Work Experience Scheme (SIWES).

- **Full-Stack Web Development:** Instructed students on building functional web applications, covering UI/UX design with HTML/CSS/JavaScript (Front-End) and database/API integration (Back-End).
- **Database & Cloud Management:** Trained interns in database design, writing efficient SQL queries, ensuring data integrity, and deploying applications onto scalable cloud hosting platforms.
- **Network Infrastructure:** Guided students through setting up routers and switches, implementing network security protocols, and troubleshooting connectivity faults.
- **Hardware & Software Engineering:** Supervised practical sessions on PC assembly, operating system installation, configuration, and diagnostics for hardware/software issues.
- **Software Testing & Debugging:** Taught students how to run code diagnostics, identify syntax and logical errors, and implement debugging best practices.

TECHNICAL ENGINEERING & SOFTWARE DEVELOPMENT PROJECTS

Artificial Intelligence & Machine Learning Architectures

- **Cyberbullying Detection System via Deep Learning** | *Technical Consultant | 2026*
  - *Research Reference: Miss Elizabeth Audu | The Federal Polytechnic, Nasarawa*
  - Engineered a social media monitoring application utilizing a fine-tuned **DistilBERT machine learning model** to detect and flag instances of cyberbullying in real time.
- **Food Price Prediction Platform** | *Software Engineer (Contract) | 2024*
  - *Research Reference: Dr. Adebayo P.O | The Federal Polytechnic, Nasarawa*
  - Developed a predictive application integrating Python data-scraping scripts with **regression-based machine learning algorithms** to forecast agricultural market pricing trends in Northern Nigeria.

- **AI-Driven E-Commerce Recommendation Engine** | *Full-Stack Developer* | *2026*
  - *Research Reference: Hajiya Hauwa* | *The Federal Polytechnic, Nasarawa*
  - Built an intelligent recommendation platform using Python and **Streamlit**, implementing collaborative filtering algorithms to deliver personalized product suggestions based on user behavior datasets.
- **Healthcare IDS & Diabetes Prediction System** | *Software Engineer (Contract)* | *2026*
  - *Research Reference: Mr. Okpala Uche* | *The Federal Polytechnic, Nasarawa*
  - Programmed a specialized medical application simulating a healthcare Intrusion Detection System (IDS) that applies machine learning classifiers to predict diabetes risks from clinical parameters.
- **AI Personalized Fitness Engine** | *Technical Consultant* | *2026*
  - *Research Reference: Miss Elizabeth Audu* | *The Federal Polytechnic, Nasarawa*
  - Created an intelligent fitness management system that generates algorithmic workout regimens, tracks physical performance tracking, and outputs adaptive lifestyle recommendations.

Cybersecurity, Cloud, & Infrastructure Systems

- **Network Intrusion Detection System (NIDS)** | *Software Engineer (Contract)* | *2026*
  - *Research Reference: Mr. Patrick* | *The Federal Polytechnic, Nasarawa*
  - Designed and deployed a sophisticated real-time network defense tool utilizing **Convolutional Neural Networks (CNNs)** built on Python 3.12, featuring a dynamic **Streamlit** dashboard for packet threat analysis.
- **Data Fragmentation & Enterprise Encryption Systems** | *Technical Lead* | *2026*
  - *Research Reference: Dr. Badmos Tajudeen / Dr. Akpan Emem* | *The Federal Polytechnic, Nasarawa*
  - Engineered enterprise-grade data security systems utilizing fragmentation algorithms to chunk, encrypt, and secure database transmissions across distributed cloud environments via a Streamlit web portal and an SQLite database layer.
- **Cybercrime Tracking Architecture** | *Software Engineer (Contract)*| *2026*
  - *Case Study: Masaka Police Station, Karu LGA* | *Ref: Mr. Adio Sabo*
  - Programmed a live-feed cybercrime reporting and monitoring framework designed to help local law enforcement map, track, and log active digital fraud reports.

- **Vulnerability & Data Mining Framework** | *Software Engineer (Contract)| 2026*
  - *Research Reference: Dr. Mebawondu Jacob Olorunshogo | The Federal Polytechnic, Nasarawa*
  - Developed a data-mining script architecture using Python to run penetration-testing simulation passes and identify logic bugs and security vulnerabilities within web-based Information Management Systems (IMS).
- **Smart Residential Fire Detection Engine** | *Software Engineer (Contract) | 2026*
  - *Research Reference: Miss Elizabeth Audu | The Federal Polytechnic, Nasarawa*
  - Created a safety framework utilizing rule-based detection logic and sensor data simulations to push real-time alerts through an integrated Streamlit telemetry dashboard.

Blockchain, Biometrics, & Enterprise Applications

- **Tamper-Proof Blockchain Certificate Platform** | *Software Engineer (Contract) | 2026*
  - *Research Reference: Dr. Akuso N.I | The Federal Polytechnic, Nasarawa*
  - Developed a secure, decentralized web platform using Python to facilitate the unalterable digital issuance, tracking, and institutional validation of academic certificates.
- **Multi-Modal Biometric Voting Web Application** | *Full-Stack Developer | 2025*
  - *Research Reference: Dr. Momoh A. Mohammed–Sanusi | The Federal Polytechnic, Nasarawa*
  - Programmed an online voting framework integrating multi-modal biometric logic gates (simulated facial and fingerprint authentication modules) to prevent identity duplication.
- **Mobile Facial Recognition Attendance Platform** | *HND Computer Sci. Project | 2023*
  - *Research Reference: Dr. Momoh A. Mohammed–Sanusi | The Federal Polytechnic, Nasarawa*
  - Built a mobile application featuring local biometric processing pipelines to automate student registry logging via real-time facial recognition verification.

- **PC Hardware Architecture Diagnostic Project** | *ND Engineering Project | 2016*
  - *Academic Supervisor: Mr. James O. Mathew | Delta State Polytechnic, Otefe-Oghara*
  - Conducted systematic component teardowns of high-performance Intel Core i7 computing assets to document physical fault diagnostic routines and hardware performance optimization.

EDUCATION

Higher National Diploma (HND) in Computer Science *2021 – 2023*
The Federal Polytechnic, Nasarawa | *Nasarawa State, Nigeria*

National Diploma (ND) in Computer Engineering *2014 – 2016*
Delta State Polytechnic, Otefe-Oghara | *Delta State, Nigeria*

PUBLICATIONS AND ACADEMIC WRITINGS

Collins Agofure (2023). "Mobile Application for Attendance Management System using Facial Recognition" An undergrade research poster, presented and submitted to the Department of Computer Science, School of Information Technology, Federal Polytechnic, Nasarawa. UNPUBLISHED

Collins Agofure (2016). "Assemble and Disassemble of Personal Computer (HP Intel Core i7)" A Diploma research poster, presented and submitted to the Department of Computer Engineering, School of Engineering Technology, Delta State Polytechnic, Otefe – Oghara. UNPUBLISHED

REFEREES

Mall. Usman Faruna
Deputy Registrar, Academic Board
Federal Polytechnic Nasarawa,
Nasarawa State.
07036191417

Mall. Lawal M. Magaji
Deputy Registrar, Human Resources,
Federal Polytechnic Nasarawa,
Nasarawa State.
08129119083

Mr. Hula A. Nyam
Principal Assistant Registrar
Federal Polytechnic Nasarawa,
Nasarawa State.
08124919842

Mr. Felix Agofure ASP
Nigerian Mobile Police Force,
Delta State Command Headquarters,
08038343779
